Packshot*Creator* Mini 2.0

- Made to shoot products up to 15 cm tall: toys, fashion accessories, pharmaceutical products, packagings...

- HD photos and 360-degree animations

- Ideal for marketing, communication, quality control, archives, public relations...

- Small-sized lightbox integrating a symmetrical lighting system

The mini studio created for your smallest items

Packshot*Creator* Mini 2.0 is the ultra-compact Packshot*Creator* solution. Made for products up to 15 cm tall, this all-in-one equipment is particularly appreciated by the jewelery, cosmetics, food and eyewear sectors.

Visual creation at your fingertips
Highlight your products on your communication supports with HD photos and interactive 360-degree views.

The Packshot*Creator* equipements can be used by anyone: once your product is placed in the lightbox, the entire system is controlled by the Packshot*Creator* software that synchronizes the turntable with the camera shutter. Capture your product from all angles!

The animation settings (number of frames, size, format, camera settings…) are displayed in real time on your screen for better use.

Boost your productivity
The custom settings of your pictures and animations can also be saved for further use.

The best of photographic technologies
The lightbox features a symmetric and constant lighting system. The result: you get pictures and animations on a white homogeneous background.

The 6500° K color termperature of the lamps reproduces a daylight type of lighting for better color and texture rendering.
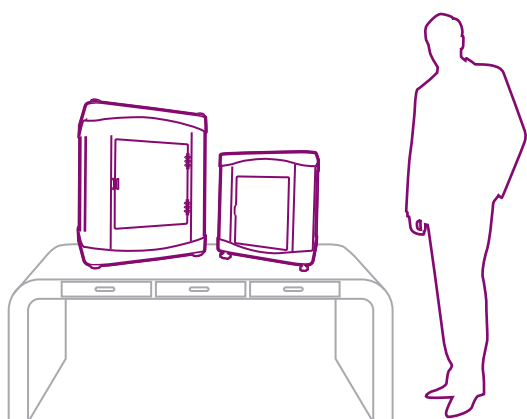

Hundreds of uses
The stunning images and animations created can be used for both the web (online store, mobile compatible website, newsletters, image bank, etc..) and printed material (catalogues, product sheets, etc.).
